Cloud-based Video Recording

When the built-in motion sensor detects movements, you will get an app notification and a 15-second video clip will be saved to the cloud (housed on AWS®). Every account has a 7-day free trial to store video clips of visits and motion alerts, and once activated and used, you can upgrade your plan to have a longer storage time (30 days) and cover multiple cameras (and video doorbells). You can also save and share video clips through your smartphone.

smanos UFO Panoramic WiFi HD Camera

Armed with an HD fisheye lens, superior night vision and accurate motion detection mechanisms, the smanos UFO brings clarity, immersive vision and ease of use to home monitoring, and can be ceiling-mounted, wall-mounted or placed on any flat surface. The 180-degree field of view ensures that you get to keep an eye on your loved ones and property – with no blind spot, day or night – on your smartphone anywhere, anytime.

An All-Seeing Eye

The smanos UFO camera works independently or with the smanos K1 system, and delivers 6 selectable HD views (Birds Eye, Panorama, Hemisphere, Triple View, Two Halves and Quad View).

- 

Full HD at 1080p
- 

Remote Viewing
- 

Motion Detection
- 

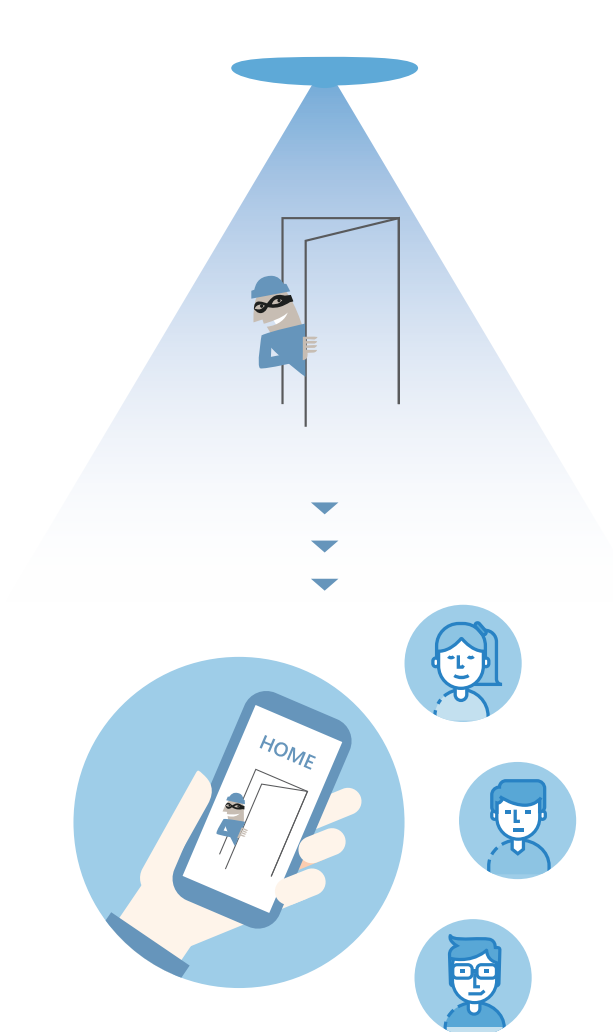

Night Vision
- 

microSD™ Card Slot
- 

Two-way Communication
- 

360° Coverage (when ceiling-mounted)
- 

24/7 Recording (with microSD™ card inserted)

Guard Your Home Around the Clock

The UFO camera is always recording in a loop onto your microSD™ card (not included), and you only get notifications when motion is detected (user adjustable). You can remotely access recorded footage or motion triggers from anywhere in the world, anytime.
